

## Description

**CASAMOD 450** is an additive that is used as a processing aid in the manufacture of polymers / plastics and also in rubber products.

## Typical Properties

Assay	99%
Alcohol content (THFA – tetrahydrofurfuryl alcohol)	0.5%
Water content	0.2%
Inhibitor content (BHT – butyl hydroxy toluene)	300 ppm

## Application

**Casamod 450** has found use in the polymer industry during polymerisation of a range of monomers to produce copolymer species of many types. It is also used as a chain transfer agent to control molecular weight.

Other applications for **Casamod 450** include its use in the rubber industry in general, as a processing additive.

## Shelf Life

Store under cool, dry conditions. It is recommended that the material be used within 9 months of certification.

## Handling

**CASAMOD 450** is flammable and should be stored and used in accordance with the appropriate regulations. Please refer to the appropriate Material Safety Data Sheet (MSDS) for more detailed information.
